

For Learning That Lasts A Lifetime

3rd March 2025

Dear Parents/Carers

Science Week: 10th – 14th March – Change and adapt

Next week is **British Science Week** and we will be celebrating this in school with all things science! The theme of the week will be '**Change and adapt**'. The children will be taking part in activities throughout the week planned to get the children excited and engaged about science. Please look at the British Science Week website for more information:

Throughout the week, we will also be exploring the theme of '**Smashing Stereotypes**' where we will be celebrating diverse people and careers in science and engineering.

Science Week will be a great opportunity for science to take centre stage and for the children to get involved, and really embrace how exciting science can be. We hope that these hands on experiences will inspire children further in their love of learning and interest in Science. We trust that you will feel as excited about the week as we do in school.

We're all looking forward to an exciting science week!

Yours sincerely

H. Moloney
