

For Learning That Lasts A Lifetime

5th March 2026

Dear Parents/Carers

Science Week: 9th - 13th March – Curiosity: What's your question?

Next week, is **British Science Week** and we will be celebrating this in school with all things science! The theme of the week will be '**Curiosity: What's your question?**'. This year, we will be celebrating British Science Week by having a whole school 'Science Day'. Throughout the day, the children will take part in a carousel of exciting, hands-on investigations. Each classroom will be running a different scientific enquiry, and the children will move around the school working collaboratively, exploring new ideas and developing their curiosity.

Science Day will take place **on Thursday 12th March** and the focus of the day is to encourage children to think like scientists by asking questions, making predictions, testing ideas and reflecting on what they discover.

We would also like to warmly invite parents and carers into school on **Friday 13th March at 2:45pm** to come and see what the children have been working on. Please collect your child from their usual classroom door at 2:45pm and then bring them into the school hall via the main office entrance. From there, the children will be able to take you around the hall and proudly share their investigations, creations and learning from the day.

Please look at the British Science Week website for more information:

Throughout the week, we will also be exploring the theme of '**Smashing Stereotypes**' where we will be celebrating diverse people and careers in science and engineering.

Science Day should be a wonderful opportunity for children to work with different teachers and experience the excitement of practical science in a fun engaging way. We are very much looking forward to sharing this learning with you.

Yours sincerely

H. Moloney
